Foreword

Population Census is indeed the only recognized and reliable source in Bangladesh for complete and quality database related to population size, spatial distribution and all basic characteristics of population from national level down to village. Bangladesh Bureau of Statistics (BBS) had conducted the fifth Population and Housing Census during the period from March 15-19, 2011 starting at the zero hour of 15 March, 2011. The publication of **Urban Area Report** is undertaken on the basis of census results to meet the demand of data and information related to urban area of the country.

The census results for urban areas such as City Corporation, Paurashava and Upazila Headquarters of the country are furnished in the Urban Area Report in order to facilitate the users at various levels. Two sections of the report namely, "At a Glance" and an "Analytical Findings" will be of special interest to the users. I believe that the classified data presented in the report will provide quality benchmark database to policy makers, planners, researchers, administrators, development partners and other agencies for formulating and implementing their plans and programmes for overall development. I also believe that this report will be helpful for all users both at home and abroad.

The dedicated efforts of personnel employed in census have tremendously helped for the success of census. Moreover, the participation of people at large also plays a vital role in this operation. I deeply acknowledge the active participation and commendable cooperation of all the government and non-government organizations, district and field administration, different local government bodies, print and electronic media of the country for making the census possible. I also express my gratitude to the European Union (EU), US Census Bureau, U.S. Agency for International Development (USAID) and United Nations Population Fund (UNFPA) for their financial and technical support for completing this huge task. I express my heartfelt gratitude to Honorable Minister, Ministry of Planning for his effective guidance and significant cooperation throughout the Census operation. We are also grateful to the respected Cabinet Secretary and the Senior Secretary, Ministry of Public Administration for their active cooperation.

The Population and Housing Census had made best use of the modern Information technology. In order to minimize time and manpower, modern technology like ICR (Intelligent Character Recognition) machines and iCADE (Integrated Computer Assisted Data Entry) system were used in capturing the census data. CSPro software was used in analyzing and processing of data. In earlier censuses, it took a long time to publish the final report following the enumeration. We had a plan to reduce the gap by publishing all reports including Community and Zila Reports for Population and Housing Census 2011, within the shortest possible time. The census preliminary report has been published within 4 months of data collection. I express my thanks to Director General and Deputy Director General of BBS, Project Director, Population and Housing Census 2011, members of the Editors' Forum, Project Directors' Forum and all other officers and staff and report writing consultants involved in the efforts and finally bringing out this report.

Preface

Bangladesh has a long tradition of conducting the population census on decennial basis since 1872. The fifth population census of Bangladesh and fifteenth in the region, following the decennial periodicity, was conducted during March 15-19, 2011. The main objective of the census was to collect information on the basic characteristics related to housing, households and population for developing a comprehensive database for all development planning and human resource development programmes as well as economic management.

Population and Housing Census 2011 was conducted in three phases. In the First Phase, basic data about all households and individual members of the households were collected through ICR formatted questionnaire during March 15-19, 2011. In the Second Phase, quality and coverage of the main count were verified through a Post Enumeration Check (PEC) survey during April 10-14, 2011. For the first time in the census history of Bangladesh, PEC was conducted by an independent organization, namely Bangladesh Institute of Development Studies (BIDS). In the Third Phase, detailed socio-economic information was collected by administering a long machine readable questionnaire in a sample survey held during October 15-25, 2011.

The preparatory works of the census was started by Bangladesh Bureau of Statistics from mid 2009 with updating maps and area Geo-codes. The preliminary checking on the census questionnaire was done in several times through field operation. The census questionnaire was pre-tested in selected areas with the participation of some experts of the "Technical Committee". The views of the users' and experts' were taken into consideration for finalizing the questionnaire. The census field operation and quality of census inputs were tested under two zonal operations. Accordingly the questionnaire was designed in machine readable format with the technical assistance of US Census Bureau and was printed with the financial assistance of European Union (EU) through the United Nations Population Fund (UNFPA).

The entire country was divided into 2,96,718 Enumeration Areas (EAs) with the help of enumeration area maps in order to ensure full coverage, effective management and close supervision. There was a supervisor for every 6 or 7 enumerators to supervise their works. The Geo-coding system developed in the previous Census was checked, edited and computerized.

Modified Defacto Method was adopted in enumerating the population. Zero hour at the night of 15 March, 2011 was considered as the census moment. On the other hand, the hours between census moment and the following morning (6.00 a.m.) was considered as the census night. Basically the floating people were counted at that night for avoiding omission and duplication.

Census committees were formed at Zila, Upazila, Paurasava, Union/Ward levels to ensure participation of local administration and local bodies. Moreover, supervisors and enumerators were appointed from amongst the local unemployed youths and teachers.

At national level, a standing technical committee comprising of well-known census experts and users of census data was formed to provide technical support to BBS in planning, designing and executing the census. A seminar-cum-expert consultation was held at BBS with the census data users, experts, researches and educationist to get their views for finalizing the census questionnaire and other policy related issues.

A nationwide publicity campaign was carried out before census through posters, banners, leaflets, brochures, features, films, miking, radio, television and newspapers for the purpose of creating public awareness and motivation.

I express my heartfelt gratitude to the Honorable Minister for Planning for his effective guidance and significant cooperation in making the census a success. I express my deepest gratitude to Secretary, Statistics and Informatics Division (SID) for his whole-hearted support and cooperation to the census. Moreover, members of 'Steering Committee', 'Standing Technical Committee', Consultants and also to participants of the Seminar-cum-Expert Consultation for their valuable contributions for finalizing the questionnaire and the census programme. I am thankful to all members of the sub-committees on publicity, sampling and report writing for their valuable contribution. I am also thankful to our mass media, local bodies and the people at all level for their whole-hearted supports to the census.

Finally, I like to thank Deputy Director General, BBS, Project Director, Population and Housing Census 2011 Project, members of the 'Editorial Committee', 'Editors Forum', 'Project Directors' Forum' and other officers and staff members of BBS who vigorously helped in implementing the census activities and processing the census data with their relentless efforts to make the census a success and bringing out this report within a very shortest possible time.

2011	39847550 (including SMA enumerated)	27.66
	41943532 (including SMA adjusted)	28.00

Note: 1. SMA stands for Statistical Metropolitan Area
 2. * Excluding SMA, growth centres and some other urban areas.

Map of Bangladesh

CHAPTER - 1

INTRODUCTORY NOTES ON CENSUS

Background: The practice of census taking in the area, now Bangladesh, started in 1872. Thereafter, another census was conducted in 1881 and from then the decennial periodicity of census was maintained with the exception of 1971 cycle which was held up and delayed till the year 1974 because of liberation war. The 1974 census was the first ever census in Bangladesh after her emergence as a new independent nation in 1971. Bangladesh went back to the decennial periodicity and held the second, third, fourth and fifth censuses in the years 1981, 1991, 2001 and 2011 respectively.

Geographic Area and Location: According to the Aryannak Brahmin and the religious books of Budhist, Bangladesh is one of the most ancient inhabited areas of the subcontinent. During the ancient Hindu period this area was split into different regions such as Gour, Pundra and Barind on the north, Rahr and Tambralipi on the west and Banga, Samatata, Harikel and Bangal on the south and on the east. During the Muslim period these regions were united and became known as **Bangla** or Bangala. According to Ain-I-Akbari the ancient name of this area was **Banga**. During the British period the Bengali spoken area of this region became a province and was called Bengal. In 1947, Bengal was partitioned into East Pakistan (now known as Bangladesh) and West Bengal (now a State of India). On the 26th March 1971, East Pakistan was liberated after a long bloody struggle and emerged as a sovereign state named Bangladesh.

Bangladesh lies in the north eastern part of South Asia between 23°34' and 26°38' north latitudes and 88°01' and 92°41' east longitudes. The country is bounded on the north and on the west by India, on the east by India and Myanmar and on the south by the Bay of Bengal. It has a total area of 147,570 sq. km. (56,977 sq. miles) of which 25,973 sq. km. is under forest.

Census Operation: For census operation, the whole country was divided into 6 census divisions, 23 census regions, 130 census zilas, 2612 census zones, 48531 Supervisors' Areas (SAs) and 293579 Enumeration Areas (EAs). Each zone consisted of about 100 EAs and each Supervising Area (SA) comprised of 6 or 7 EAs. The large mauzas / villages were divided into two or more enumeration areas and small mauzas/ villages were merged to form an enumeration area consisting of about 120 households, keeping in view the terrain and habitation pattern of the locality.

The population and housing census is the unique source of reliable and comprehensive data about the size of the population of the country, major socio-economic and socio-demographic characteristics.

It is the total process of collecting, compiling, evaluating, analyzing and publishing or otherwise disseminating demographic, economic and social data pertaining, at a specified time, to all persons in a country. The essential features of a population census are individual enumeration, universality within a defined territory, simultaneity and defined periodicity.

The population and housing census provides information on the geographic and administrative distribution of the population and household in addition to the demographic and socioeconomic characteristics of all the people in the country. The data from the census are classified, tabulated and disseminated so that political leaders, election officials, planners, national organizations including NGOs and civil society, regional and international organizations can use the data in making decisions.

The purpose of Urban Area Report is to disseminate census data by City Corporations, Cities, Paurashavas, Wards and Mahallas and Upazila headquarters. The planners, researchers and policy makers as well as development partners will find this report as a valuable reference for use in advising plans and programmes for advancing welfare and well-being of the common people, in particular to the urban.

Objectives: The population census was carried out to achieve the following objectives:

- To conduct the 5th national population and housing census of Bangladesh through count of 100% households and population on specific date of 2011.
- To develop database or benchmark data for local level planning up to village and union level.
- To prepare sampling frame for all censuses and surveys.
- To prepare data for electoral roll of national and local elections;
- To prepare data for fixation of quota and proportionate distribution of resources.
- To prepare data for implementation of development works at the local levels.
- To prepare data base for micro-credit and productive employment at the local level.
- To generate data for ensuring education for all through participatory approach.
- To prepare database for assurance of health and nutrition for all through social mobilization.
- To make population projection at the regional level.
- To generate data for preparation of monographs and monitoring the progress of MDGs such as, alleviation of poverty through accelerated economic growth, generation of productive employment, human resource development, compulsory primary education and assurance of health and nutrition for all by 2015.

Census Phasing: The census data collection was completed in three phases.

Phase I - Main Count: Collection of basic information for all households and individuals using an ICR formatted Questionnaire.

Phase II- Post Enumeration Check (PEC): A PEC survey was carried out to measure quality and coverage of the main census count. The survey was conducted immediately after receiving filled-in census questionnaires in Dhaka head office. For the first time in census history of Bangladesh, the PEC was conducted by an independent organization, Bangladesh Institute of Development Studies (BIDS).

Phase III- Sample Census: A sample census (large scale sample survey) was carried out at the last phase. For this undertaking, ICR formatted long questionnaire was adopted to supplement the data of the main census. Being a programme of much wider information coverage, the sample census provided detailed data relating to population and household characteristics including fertility, mortality, morbidity, migration etc.

Census Planning: The census preparatory work programme was mounted in mid 2009. A census work-plan was prepared defining in details the activities to be performed and completed by specific dates in each calendar year. Field instruction manual and training manual were produced for census workers of different stages. These manuals provided precise guidelines regarding: (i) duties and responsibilities to be performed at all levels, (ii) lessons to be given when imparting trainings to field supervisors and enumerators, (iii) mapping and geo-coding operation to be done, (iv) questionnaire to be filled-up, (v) enumeration and supervision disciplines to be adhered, (vi) census workers to be put in place (vii) census materials be distributed and (viii) publicity plan to be implemented.

Mapping: The updated and well furnished map is one of the basic instruments to the success of any population and housing census. The primary objectives of the mapping operation is (i) to update the produced GIS maps and delineate enumeration areas (EA) in the country to facilitate the smooth counting of inhabitants during enumeration and (ii) fundamentally to ascertain that all areas are covered and that everyone in the country is counted with minimal possibility of under or over counting.

Household counting for EA demarcation and concurrent EA mapping activities were carried out in two phases beginning from May, 2009. The First phase, confined to exclusively rural areas, necessitated updating and preparing union, mauza, and control maps. The second phase was initiated only for urban coverage in view of the complex task associated with household and EA boundary identifications due to quite dense habitations in urban localities. All urban ward, mahalla,

and control maps were updated and/or newly prepared showing current boundaries. BBS used GIS Maps for field operation for the first time in census history of Bangladesh. GIS Maps Project of BBS produced the maps from aerial photography. The updated maps were used for zonal operations. All maps were finally checked and updated during zonal operations. The updated EA maps were used for main census, PEC and sample census.

Designing and Pre-testing of Questionnaire: The contents of census questionnaire were determined based on data needs assessed on government current priorities and also recommendations of technical committee experts and data users. Several preliminary checks of the questionnaire were made locally. Lastly, the questionnaire was pre-tested in selected areas with participation of some experts of the technical committee. Satisfactory pre-test results were resolved finalising a two moduled questionnaire for adoption in the census. Accordingly the questionnaire was designed in machine readable format with the technical assistance from US Census Bureau and was printed abroad with the financial assistance from European Union (EU) through United Nations Population Fund (UNFPA).

Questionnaire: A two moduled questionnaire was used for the main census. As many as 25 questions were included in it. Of them 11 questions relating to housing and household characteristics were covered in household module. The remaining 14 questions focusing on household individuals were incorporated in individual module. The questionnaire items were identification, address of household, number and structure of house including tenancy, toilet facility, electricity connection, ethnicity, individual age, sex, religion, marital status, literacy, disability, education and working status. All data on the items were collected through visiting house to house and interviewing head of the household or responsible member in absence of head of the household.

Zonal Operation: Two zonal operations were executed in both urban and rural areas. These operations allowed setting up a system germane to: (i) involve local people in the census, (ii) interact with local bodies, and (iii) ensure efficient field work arrangements.

The first zonal operation was held during May-July 2010 in 3 (three) phases. In first phase it covered 39 zilas, second phase 17 zilas and third phase 8 zilas. During first zonal operation the following tasks were completed:

- a) Updating of geo-code list;
- b) Updating of Mauza and Mahalla maps with demarcation of EA boundaries;
- c) Preparing Supervisor sketch maps;
- d) Preparing primary list of local enumerators and supervisors with names and addresses and
- e) Identifying depopulated Mauzas and Mahallas.

Besides, Zonal Officers introduced themselves to the public representatives of different bodies and local administration and sought their support and cooperation in completing census activities successfully.

The second zonal operation was mounted just three months prior to census, i.e. November-December 2010, to conduct the main census in March, 2011. This schedule ensured the smooth flow of census activities including field management system.

The second zonal operation featured completing tasks such as:

- (a) Instituting census committees in zilas, upazilas/thanas, wards/unions, paurashavas and city corporations,
- (b) Interacting with local bodies,
- (c) Verifying supervisor maps and getting those finalised,
- (d) Finalising the lists of supervisors and enumerators and
- (e) Checking and endorsing locations and available facilities of training centres selected to train enumerators and supervisors. All these activities were performed by 2,612 Zonal Officers under supervision of 130 Census Zila Coordinators who were engaged from BBS and other ministries.

In forming EAs, the terrains and habitation patterns of localities were taken into consideration. Mauza/Ward maps were used for exact identifications of EAs within mauzas and wards. During census enumeration final base maps and supervisor maps were used by the zonal officers, enumerators and supervisors for field control and overcoming coverage errors.

Organization: The lowest unit of census was enumeration area (EA). All over the country as many as 2,96,718 EAs were delineated. Above them there were 48,531 supervisors' areas (SAs) with every SA having 6-7 EAs. For each EA one enumerator and for each SA one supervisor were appointed temporarily from amongst local educated youths. Females were given priority in selecting enumerators and supervisors. Enumerators and supervisors were controlled by 2,612 Zonal Officers. Immediately above zonal officers there were 130 Census Zila Co-coordinators deployed from Class-I officers of BBS and other ministries. The Project Director of Population and Housing Census Project was the coordinator of field activities and maintained liaison with higher authority and different organizations. The Director General of Bangladesh Bureau of Statistics acted as the National Census Coordinator. The Secretary of Statistics and Informatics Division was the Chief Census Coordinator who guided the whole system of census programme and implementation.

The local administration and public representatives participated in the census through census committees formed for City Corporations, Paurashavas, Zilas, Upazilas, Wards, and Union Parishads. The Mayors of City Corporations and Paurashavas, Deputy Commissioners, Upazila Chairmen, Ward Commissioners and Chairmen of Union Parishads headed by respective census committees with BBS officials being the Member-Secretaries.

Central census control room was established at Dhaka headquarters of BBS (Parishankhan Bhaban) under active supervision of the Project Director. Similarly control rooms were established in each spheres of administrative levels namely zila, upazila and union. These control rooms functioned round the clock during entire field enumeration period. A number of officials were engaged to provide logistics during census field activities, monitored constantly the census performance, informed the National Coordinator and Chief Census Co-ordinator about performance status and obtained their instructions for successful completion of the census.

Enumeration: The population across the country was counted at a stretch in five days from 15-19 March 2011 using machine readable questionnaires. The counting began at zero hour of 15 March 2011. Floating people were counted from zero-hour till 6.00 am (the hours called census night) at the places where they were detected passing the night. In case of households, on the other hand, all members were enumerated in their residences. The modified de-facto method was followed in counting, i.e. every person was counted at the place where he/she stayed in the census night except the people on board and on duty, counted at their residence.

Data Capturing/Processing: The adoption of Intelligence Character Recognition (ICR) strategy was planned for census data capturing. As such, ICR machines were procured. BBS had gathered experience in OMR and OCR techniques data capturing from earlier censuses of 1981, 1991 and 2001. The ICR technology was introduced at this census in BBS. US Census Bureau supported BBS in using Capture-Pro and iCADE (Integrated Computer Assisted Data Entry) system for data capturing. For analyzing and tabulating census data CS-Pro software was used.

iCADE: Integrated Computer Assisted Data Entry provides digital images of respondent questionnaires. Data is processed through OMR, OCR, and KFI, quality assurance, and automated detailed tracking of each step in the process.

Steps:

1. **Batching and Batch Identification:** Completed Census Questionnaires are batched for processing. An identifying batch cover sheet is created. Batch status numbers are kept in the database along with other relevant metadata.

2. **Scanning:** Each page from the batched Census Questionnaires is scanned into a TIFF Image. In each step status info is kept in the database.
3. **Auto-registration:** Auto-registration relates images to the Master Template, registers Form barcodes, and reads checkboxes. There may be preliminary “mini” OCR processing here. Auto-registration then creates a script with data captured so far.
4. **Manual Registration:** Images where auto-registration detected positional tolerance errors are sent to a clerk, who resolves skewing and bar code issues and repairs checkbox ambiguities. The OMR clerk examines all checkboxes.
5. **Batch Completeness/Exception Review:** Batch Completeness identifies batches with problems, forms with missing, loose, or duplicate pages, batched not scanned, scanned not batched. In Exception Review, the clerk researches each issue (checking paper forms if needed) and takes appropriate action.
6. **OCR Review:** Converts designated handwritten and printed text fields to electronic data, with greater than 99% accuracy for numbers. A clerk then reviews OCR results, verifying all 1s, 2s, etc. Any rejected field must be reprocessed using KFI.
7. **Key From Image (KFI):** The OMR portion of the programme will capture check box data prior to KFI. KFI technology guides a keying clerk to the write-in fields on the form where the system detects presence. Furthermore, a keyer will not be taken to any fields already read by the OCR engine. Keyers may also re-register skewed pages or correct checkbox answers.
8. **Quality Assurance (QA):** Two samples are drawn, one from the OCR read “universe” and one from the KFI keyed-in “universe”. They are sent to an independent keyer to be rekeyed. OCR and KFI may have different sampling rates and different accept/reject quality rates. These results are then verified against the earlier captured data, and discrepancies are presented and corrected by analysts.
9. **Sample Verification, Classification and Adjudication:** A sample of the fields is keyed in by an independent verifier. A classifier reviews images and data from OCR/KFI and compares with verifier’s data. An adjudicator determines final truth and decides if the batch is acceptable, and determines the cause of discrepancies, which may be charged against the original keyer.
10. **Remainder Verifier, Classifier and Adjudicator:** If batch quality for either universe is unacceptable, all remaining fields are rekeyed by a verifier, and results are compared and corrected by a classifier, and adjudicated by a final adjudicator.

All records were subject to an efficient computer edit and imputation programme. The errors and inconsistencies, if detected, were imputed by applying both 'hot-deck' and 'cold-deck' methods.

For all zilas, separate files were maintained. The census tabulation plan was finalised through technical committee recommendations admitted of options for comparing most of the individual cells with 2001 census results. The tabulation programme was developed in CS-Pro and thoroughly tested before adopting for census tabulation. All tables generated were transferred to MS Excel/MS Word format for ensuring correct headings and footnotes.

Publication: The census reports to be published will provide population information at the national, zila and community levels. Besides the Community Reports, National, Analytical, Zila Reports, Socio-economic & Demographic Report, Administrative Report and some Thematic Area Reports will be published during the coming months.

Post Enumeration Check (PEC): To assess coverage of the census an effectively designed Post Enumeration Check (PEC) survey was conducted just a month after completing the census. Bangladesh Institute of Development Studies (BIDS) conducted the PEC survey. The PEC survey data were collected during 10-14 April 2011. The net under coverage rates estimated separately for national level aggregate and also for rural, urban, other urban (Upazila Headquarters) and City Corporation areas are given below:

Locality	Net error rate (%)
National	3.97
Rural	3.80
Urban	5.26
Other Urban (UHQ)	4.07
City Corporation	3.86

The full PEC survey report can be obtained from Bangladesh Institute of Development Studies (BIDS) and the following online addresses of Bangladesh Bureau of Statistics and BIDS respectively: www.bbs.gov.bd and www.bids.org.bd

CHAPTER -2

CONCEPTS, DEFINITIONS AND METHODOLOGIES

The concepts and definitions adopted for the census and those presented in this report are as follows:

Census Moment

It is the precise time hour fixed for starting up census enumeration nationwide. In the census the zero hour of 15 March 2011 was the census moment.

Census Night

The time span from census moment to 6:00 am of 15 March 2011 was the census night.

Census Period

It denotes the days devoted to complete the census enumeration activities. In this census 15-19 March 2011 made up the census period.

Reference period

It is reference time cut off to which particular sets of census data items relate. In this census two reference periods were used. These are:

- i) Field of Economic Activity: One week preceding census moment (8 to 14 March 2011)
- ii) For other variables: Census night.

Modified De-facto Method

It means the system of enumerating people at places of their stay in the census night. Adhering to this method the counting of floating population across the country was completed during census night by interviewing them just at places of their night stay except the people on duty or on board. The remaining vast number of people found in usual residences were counted (including people on duty or on board) during 5 (five) days census period by fixing places of their stay during census night. As this is the slight deviation of de-facto method, so it is termed as modified de-facto.

Floating Population

People detected passing the census night at railway stations, launch ghats, bus terminals, boats, temples, pagodas, mosques, hotels (boarders), footpaths, under building-stairs, overpass/underpass and some other unusual places. Also the people who were fishing at deep sea and living in the forest especially in the Sundarbans were treated as floating population.

Household

Persons, either related or unrelated, living together and taking food from the same kitchen constitute a household. A single person living and eating alone forms one-person household. Households are classified into three groups as defined below:

- i) **General (dwelling) Household:** Includes all households having usual dwelling places. In 2001 census it was used as dwelling household.
- ii) **Institutional Household:** Hospitals, clinics, jails, barracks, orphanages, hostels/halls of educational institutions etc. were treated as Institutional Households.
- iii) **Other Household:** Includes those households other than general and institutional found in census night such as messes, shops, offices etc.

Ownership and Tenancy of Dwelling Unit

Tenancy status of dwelling units distinguishes the following three classes:

- i) **Owned:** Dwelling unit found occupied and used by household owning it.
- ii) **Rented:** Dwelling unit found occupied and used under arrangement of contractually rented.
- iii) **Rent free:** Dwelling unit found occupied and used without rent.

Literacy

It denotes ability to write a letter in any language. Literacy status assessment is made for population 7 years and over, 15 years and over, and also for population of all ages.

Community

It refers to the following geographic, administrative or revenue units:

- i) **Union:** Smallest administrative rural geographic unit comprising of mauzas and villages and having union parishad institution.
- ii) **Mauza:** Smallest revenue geographic unit having Jurisdiction List (JL) number.
- iii) **Village:** Lowest rural geographic unit either equivalent to a mauza or part of a mauza.
- iv) **Ward:** Smallest administrative urban geographic unit comprising of mahallas and having ward council institution.
- v) **Mahalla:** Lowest urban geographic unit having identifiable boundaries.

Urban Area

The definition of urban area used in different censuses has not been uniform. The definition of urban area used in 1981 was continued up to 2001; however, the definition was changed in 2011. In earlier censuses, the urban area included city corporations, municipalities, upazila headquarters, growth centers, cantonment and urban agglomerations adjacent to large cities, i.e., city corporations termed as Statistical Metropolitan Area (SMA). However, in 2011, the concept of SMA, growth center and some other urban areas was abandoned and the areas covered only city corporations, paurashavas, upazila headquarters and cantonment area. Due to the definitional change, the percentage of urban population has decreased and come down to 23.30% in 2011 as against 23.53% in 2001. If the same areas would have existed in 2011, the percentage of urban population might have been 28.00% in 2011. For the convenience of the users an analytical overview is presented in this chapter. In addition, an exercise on growth centers and some other urban areas are also presented at the annexure of the report.

In Bangladesh the urban areas have been classified into six categories according to their functions and sizes.

- i) **Mega City:** It is metropolitan area having population 5 millions or more.
- ii) **City Corporation:** It includes city corporations incorporated and administered by the Ministry of Local Government under City Corporation Act, 2009.
- iii) **Paurashava/Municipality Area (PSA):** It includes paurashavas incorporated and administered by local government under Paurashava Ordinance, 1977.
- iv) **City :** It is an urban area having population 1,00,000 and above
- v) **Other Urban Area (OUA):** It includes those upazila headquarters which are not paurashavas. The only exception is the 17 unions adjacent to Dhaka City Corporation under Dhaka Metropolitan Area. These unions are treated as other urban areas on the basis of their urban characteristics.
- vi) **Town :** It is an urban area having population less than 1,00,000

Growth Rate: The annual population growth rate has been computed using the annual compounding formula:

$$P_n = P_0 (1 + r)^t$$

Where,

P_n = The population of 2011 census

P_0 = The population of 2001 census

r = Annual population growth rate

t = Time period between 2011 census to 2001 census

Urbanization: Expansion and Exclusion

An Analytical Overview

The definition of urban areas used in different censuses has not been uniform. The definition of urban area used in 1981 continued up to 2001; however, the definition was changed in 2011. In earlier censuses, the urban area included growth centers (GC) and urban agglomerations adjacent to large cities, i.e., city corporations termed as Statistical Metropolitan Area (SMA). In 2011, the concept of SMA was abandoned and the areas covered only under city corporations was treated as urban area. This definitional change has made it difficult to compare intercensal urban growth or patterns.

Due to the changed definition of urban areas, the proportion of urban population declined to 23.30% in 2011 as against 23.53% in 2001. In fact, if the former SMA, Other Urban Area (OUA) and GCs are taken into account, the percentage of urban population would have been raised to 27.66%. Moreover, if the urban population of 2011 is adjusted by the PEC adjustment factor, the percentage of urban population in 2011 stands at 28.0%.

Efforts have also been made to fulfill the requirements and needs of census data users, specially researchers, planners, policy makers, administrators and devolvement partners; and as such, urban population has been computed as well as adjusted, considering the earlier concepts and presented in the table 2.1. The total adjusted urban population in 2011 is 41943532 which is 28.00% of the total population of the country as against 31077952 in 2001 which was 23.81% (Table 2.1).

Table 2.1: Intercensal Trend of Urban Population, 1961- 2011

Census Year	Population	
	Number	Percent
1	2	3
1961	2640726	5.19
1974	6273602	8.78
1981	13535963	15.54
1991	22455174 (adj)	20.15
2001	29255627 (enu) 31077952 (ad)	23.53 23.81
2011*	33563183 (enu) 35094684 (ad)	23.30 23.43
2011	39847550 (Including SMA Enumerated) 41943532 (Including SMA Adjusted)	27.66 28.00

SMA stands for Statistical Metropolitan Area, * Data without SMA and Growth Centre

The inter censal trend of urban population for the period 1961-2011 is presented in Table 2.1 and in Figure 2.1. In 1961, the urban population was only 5.19% which increased to 8.78% in 1974. In 1981 due to introduction of SMA, OUA and GC concepts the percentage of urban population increased to 15.54%. Since then, there has been steady growth of urban population in 1991 and 2001 which were 20.15% and 23.53% respectively.

Figure – 2.1: Intercensal Trend of Urban Population, 1961-2011

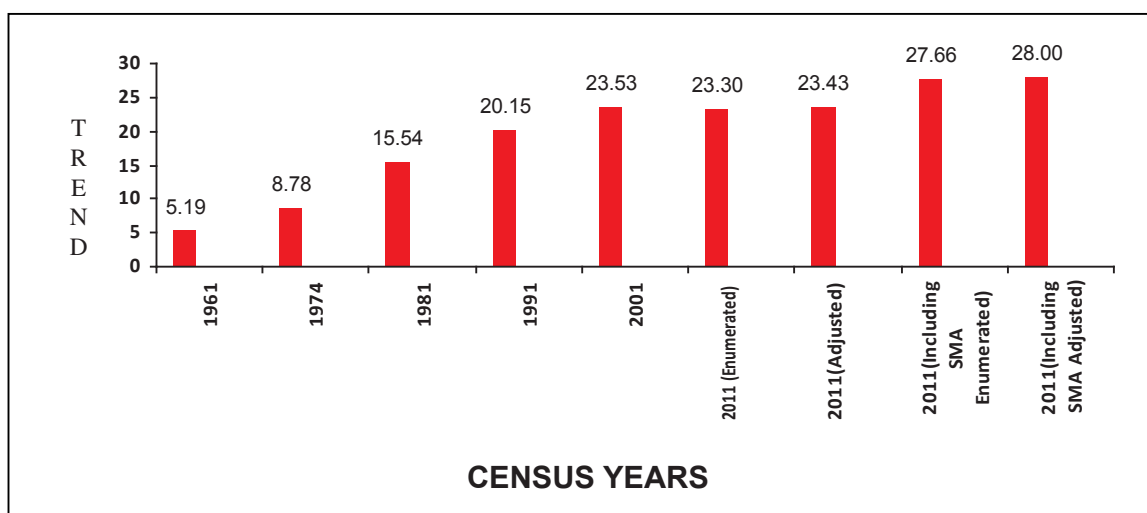

Table-2.2: A Scenario of Enumerated and Revised Urban & Rural Household and Population, Bangladesh 2011 and 2001

Locality	Household		Population						(% of total Population)	
	2011	2001	2011			2001			2011	2001
			Total	Male	Female	Total	Male	Female

NB : SMA stands for Statistical Metropolitan Area, **Enu** stands for enumerated, **Adj** stands for adjusted with PEC results.

Table-2.3: An Estimate of Household and Population of Dhaka Mega City, Chittagong SMA, Khulna SMA and Rajshahi SMA, 2011-2001 Considering the Old Definitions of Urban Area

(i) Dhaka Megacity

Locality	Household		Population					
	2011	2001	2011			2001		
			Total	Male	Female	Total	Male	Female
Dhaka Megacity	3337130	2071046	14171567	7759741	6411826	9672763	5382233	4290530
Dhaka City Corporation	1576746	1109514	6970105	3876586	3093519	5327306	3021970	2305336
Paurashavas	344395	203290	1324086	730286	593800	903394	488315	415079
Other Urban	1406087	758242	5814406	3113466	2700940	3442063	1871948	1570115
Restricted Area (Biman Bandar and (Cantonment)	9902	-	62970	39403	23567	-	-	-

- Note:** 1. Paurashavas includes Gazipur, Tongi, Savar, Narayanganj, and Kadam Rasul Paurashavas.
2. Restricted area included with Dhaka City Corporation in 2001.
3. Other Urban includes : Badda (part), Bimanbandar (part), Demra (part), Kamrangirchar, Sabujbag (part), Shyampur (part) Thana and Uttara (part) Thana, Keraniganj, Bandar, Narayanganj Sadar, Gazipur Sadar and Savar Upazila.

(ii) Chittagong Statistical Metropolitan Area (SMA)

Locality	Household		Population					
	2011	2001	2011			2001		
			Total	Male	Female	Total	Male	Female
Chittagong SMA	774721	588471	3724433	1946366	1778067	2991723	1639045	1352678
Chittagong City Corporation	556451	417339	2582401	1360695	1221706	2023489	1127516	895973
Paurashavas	19630	16235	100470	51950	48520	86770	46574	40196
Other Urban	196994	154897	1031524	526564	504960	881464	464955	416509
Ctg. Cantt.	1646	-	10038	7157	2881	-	-	-

- Note:** 1. Paurashva includes Patya and Sitakundu Paurashava.
2. Ctg. Cantt. included with Chittagong City Corporation in 2001.
3. Other urban includes: Karnafuly Thana, Hathazari Upazila and Sitakunda Upazila.

(iii) Khulna Statistical Metropolitan Area (SMA)

Locality	Household		Population					
	2011	2001	2011			2001		
			Total	Male	Female	Total	Male	Female
Khulna SMA	245824	253215	1046341	540100	506241	1172831	623723	549108

CHAPTER-3

Analytical Findings

3.1 Urbanization

According to Population and Housing Census 2011, a total of 35094684 (adjusted) persons live in urban areas which contribute 23.43% of the total population. Urbanization has been taking place in Bangladesh mainly in three ways:

- i) Area Expansion,
- ii) Rural-Urban Migration and
- iii) Population Growth.

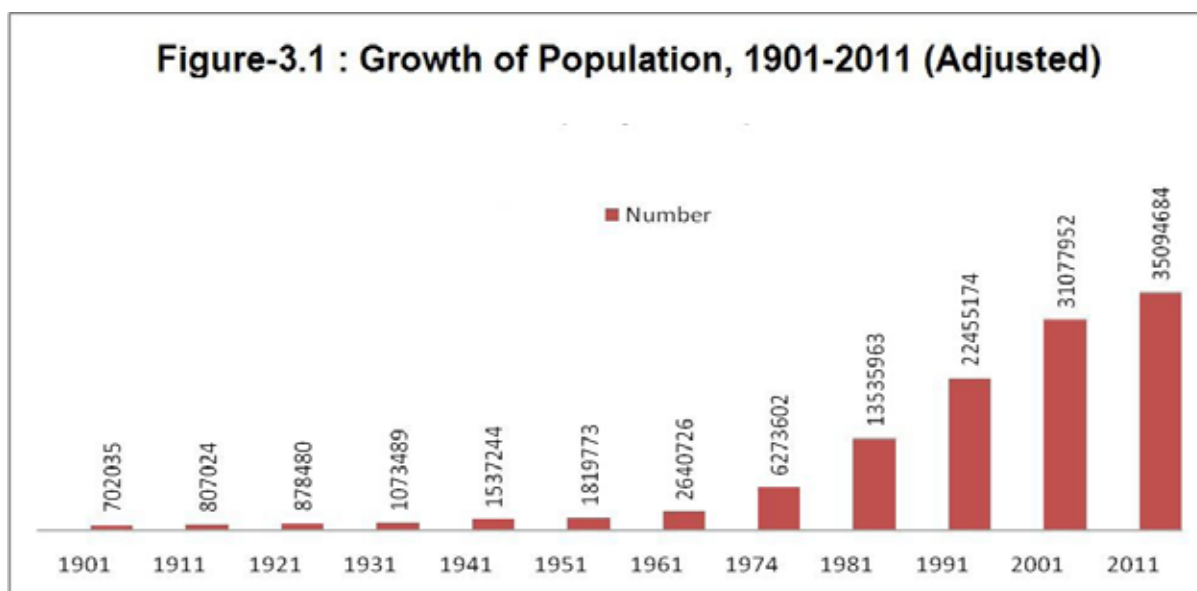

A time series of urban population and percentage over total population from 1901 to 2011 is given in table 3.1.1.

Table 3.1.1 : Intercensal trend of Urban Population, 1901-2011

Census Year	Population	
	Number	Over total population (%)
1901	702035	2.43
1911	807024	2.55
1921	878480	2.64
1931	1073489	3.02
1941	1537244	3.66
1951	1819773	4.33
1961	2640726	5.19
1974	6273602	8.78
1981	13535963	15.54
1991	22455174	20.15
2001	29255627 (Enu)	23.53
	31077952 (Adj)	23.81
2011*	33563183 (Enu)	23.30
	35094684 (Adj)	23.43
2011	39847550	27.66
	(including SMA enumerated)	
	41943532	28.00
	(including SMA adjusted)	

The proportion of urban population of Bangladesh has reached 23.43% (Adjusted) in 2011 from 2.43% in 1901. The proportion of urban population was almost similar during the period 1901-1921 after that it started increasing and the rate of increase was relatively high during 1961-1974 (137.6%), 1974-1981 (115.8%) and 1981-1991 (65.9%) Though the urban population shows substantial rise during the last three decades even then Bangladesh by and large continues to be predominantly a rural country having about 76.57% of its population living in villages. A bar diagram showing urban population growth 1901- 2011 (adjusted) is presented in figure-3.1.

Figure-3.1 : Growth of Population, 1901-2011 (Adjusted)

3.2 Area Expansion :

Area expansion is the main reason for population growth in urban area. According to 2011 census the total urban area is 8867.42 Sq.km. as against 10711.89 sq.km. in 2001, which shows a decrease of 17.22% during the decade 2001-2011. Division wise urban area expansion as mentioned in table-3.2.1 shows that the highest expansion of urban area has taken place in Sylhet Division with 13.86% followed by Barisal Division with 5.53%. The remaining 5 divisions have the negative variation of urban area during the decade under reference. This particular situation is the outcome of definitional change of urban area in 2011.

Table 3.2.1 : Urban Area Variation by Division, 2001 and 2011

Division	Area (Sq.km.)		Decadal Variation (%)
	2011	2001	
Bangladesh	8867.42	10711.89	(-) 17.22
Barisal	665.69	630.82	5.53
Chittagong	2462.29	3251.63	(-) 24.28
Dhaka	2093.47	2998.60	(-) 30.19
Khulna	1104.36	1261.80	(-)12.48
Rajshahi	1193.04	1253.98	(-) 4.86
Rangpur	872.92	897.30	(-) 2.72
Sylhet	475.65	417.76	13.86

Zila-wise urban area expansion has been presented in table 3.2.2 which indicates that the highest urban area expansion has taken place in Bogra zila with 130.62% followed by Noakhali and Sherpur zilas with 72.15% and 42.76% respectively. Variation of areas is found negative in most of the zilas of six divisions due to the definitional change of urban area in 2011 resulted from the exclusion of SMA, Growth Centers and Other Urban Areas.

Table 3.2.2: Urban Area Variation by Zila, 2001 and 2011

Table 3.2.3 shows area variation in selected cities. It is evident from the table that among the cities, urban area expansion during the decade is the highest in Bogra (393.00%) followed by Barisal (60.46%). Chandpur (59.00%) and Jessore (45.00%) and rest of the 39 cities are found in negative variation. This negative situation has happened due to definitional change of urban area in 2011.

Table 3.2.3: Area Variation in Cities having more than 100000 population, 2001 and 2011

3.3 Regional Variation:

The percentage variation of urban area and population by division, zila, urban agglomeration/cities during decade 2001-2011 have been presented in table 3.3.1. It indicates that urban population variation during this period is the highest in Sylhet Division with 48.12%. Rajshahi (18.12%), Barisal (17.13%) and Dhaka (16.61%) have the variation of urban population above the national average of 14.72% whereas Chittagong Division and Rangpur Division show population variation below the national variation of (14.72%). On the other hand, area variation of divisions are negative except Barisal Division and Sylhet Division due to exclusion of SMA, Growth Center and some Other Urban Areas in 2011.

Table 3.3.1: Variation of urban Area and Population by Division, 2001 and 2011

Division	2011		2001		Variation 2001- 2011 (%)	
	Population	Area (Sq.km.)	Population	Area (Sq.km.)	Population	Area
Bangladesh	33563183	8867.42	29255627	10711.89	14.72	(-)17.22
Barisal	1361943	665.69	1162775	630.82	17.13	5.53

Rangpur	2109071	872.92	1868314	897.3	12.89	(-)2.72
Sylhet	1462711	475.65	987538	417.76	48.12	13.86

Zila wise area and population variation in urban area during 2001- 2011 has been shown in table 3.3.2.

The inter-censal variation of urban population during the decade 2001-2011 is 14.72% (enumerated). This indicates that the population of urban areas increased at a slower rate. Table 3.3.2 shows that among the zilas, a tremendous variation of population occurred in Cox's Bazar zila with 83.19% during the decade 2001-2011. The high variation of urban population is also found in Sylhet (73.79%), Feni (72.59%), Bogra (72.31%), Comilla (56.99%), Noakhali (40.57) and Maulvibazar zila (43.21%).

3.4. Spatial Patterns of Urban Population:

In 2001 census, the total number of urban centers is found 538 as against 506 in 2011. The reason for the decrease of urban center in 2011 is mainly attributed to the exclusion of SMA, Growth Centers and some Other Urban Areas.

3.4.1 Distribution of Urban Population:

Distribution of urban population by zila during 1974 – 2011 has been shown in table 3.4.1.1. It is observed that the urban population of Bangladesh during 2001-2011 has increased by an annual growth rate of 1.38 which was 3.43 during 1991-2001. It is also observed in the table that according to Population and Housing Census – 2011, a total of 27.76% urban population of the country live in Dhaka zila alone followed by Chittagong (9.39%), Gazipur (3.09%), Narayanganj (2.95%), Rajshahi (2.55%), Comilla (2.50%), Mymensingh (2.38%), Khulna (2.32%), Sylhet (2.25%) and Bogra (2.00%). The concentration of the highest proportion (27.26%) of urban population in Dhaka Zila is mainly attributed to the shifting of a large number of people of different categories from different parts of the country in and around Dhaka city in order to get employment, higher education, medical facilities and to enjoy other amenities of life.

The division wise urban population and the percentage contribution by each division are shown in table 3.4.1.2. It is noticed that Dhaka Division alone contributes 46.44% to total urban population followed by Chittagong Division and the lowest contribution of 4.36% is made by Sylhet Division.

Table 3.4.1.2 Urban Population by Division, 2011

Division	Population	Percentage (%)
Bangladesh	33563183	100.00
Barisal	1361943	4.06
Chittagong	6905480	20.57
Dhaka	15584835	46.44
Khulna	2822121	8.41
Rajshahi	3317022	9.88
Rangpur	2109071	6.28
Sylhet	1462711	4.36

A pie chart showing urban population by division is presented in figure 3.2.

Figure 3.2: Urban population by Division, 2011

Zila wise urban area, population, household, household size and sex ratio have been furnished in table 3.4.1.3. The table shows that Chittagong zila marks the first position in respect of area with 450.88 sq.km. followed by Rangamati Zila with 384.99 sq.km. The lowest area of 38.02 sq.km. goes to Manikganj Zila. As regards Sex Ratio, Dhaka Zila maintains the first position with 123 followed by Bandarban Zila with 117. Household size of Sunamganj Zila is found highest having 5.5 followed by Cox's Bazar Zila with 5.4 persons.

Table 3.4.1.3 : Urban Area, Household and Population by Zila, 2011

Area, population and sex ratio of 43 cities having population more than 100000 have been shown in table 3.4.1.4. Among the cities, Dhaka city occupies the highest area and sex ratio of 316 sq.km. and 124 males per 100 females respectively with the first position in respect of population in 2011. The sharp decrease of area (316 sq.km.) in 2011 from 1371 sq.km. in 2001 is the result of the exclusion of SMA, Growth Centers and Other Urban Areas. The highest sex ratio in Dhaka city is mainly attributed to the migration of a large number of males in this city without their counterparts.

Table 3.4.1.4: Area, Population and Sex Ratio by City 1974-2011

Sl. No.	City	Area in Sq.km.				Population						Sex Ratio		Rank(Population)

Table 3.4.1.4 also shows decrease in the area of Brahmanbaria, Chittagong, Comilla Sadar Dakshin, Dinajpur, Faridpur, Khulna, Chapai Nawabganj, Pabna, Rajshahi, Rangpur, Saidpur and Sylhet cities during 2001-2011 due to exclusion of SMA, Growth Centers and some Other Urban Areas.

3.4.2 Distribution of Urban Population by Size Classes: Distribution of urban centers by size classes have been furnished in tables 3.4.2.1. It appears from the table that the urban centers started increasing at a faster rate from 1974. Number of urban centers started increasing at a slower rate during the period 1901 to 1961 when only 29 new centers developed. But the number of urban centers began to increase significantly from 1974 but in 2011 it has decreased. These were 104, 471, 504, 506 and 462 urban centers in 1974, 1981, 1991, 2001 and 2011 respectively. The urban units of Bangladesh have been classified into the following size classes :-

i) Towns	(T)	-	Population less than	-	100,000
ii) Cities	(C)	-	Population	-	100,000 - 49,99,999
iii) Mega City	(M)	-	Population	-	5000,000 and above

These are again sub-classified as townships.

Sub-classification of Townships, 2011

Town Size Class	Population Range
T1	Below 5000
T2	5000-9999
T3	10000-14999
T4	15000-19999
T5	20000-24999
T6	25000-49999
T7	50000-74999
T8	75000-99999

Table 3.4.2.1 shows number of Townships by size class of population during the last century.

Table 3.4.2.1 Townships by Population during 1901-2011

Census Year	Total	Size Class							
		T1	T2	T3	T4	T5	T6	T7	T8
1901	46	10	15	-	-	21	-	-	-
1911	46	10	13	-	-	23	-	-	-
1921	48	10	13	-	-	20	5	-	-
1931	56	11	17	-	-	21	7	-	-
1941	57	3	19	-	-	20	13	2	-
1951	61	7	17	-	1	20	13	2	-
1961	74	10	20	-	2	21	14	5	-
1974	104	4	12	-	4	48	19	17	-
1981	471	160	129	-	8	110	41	23	-
1991	504	325	80	-	17	49	14	19	-
2001	506	60	90	81	54	53	118	37	13
2011	462	25	64	58	50	43	159	46	17

The cities are sub-classified as follows.

Sub-classification of Cities, 2011

Cities size class	Population Range
C1	100000-199999
C2	200000-299999
C3	300000-399999
C4	400000-499999
C5	500000 - 999999
C6	1000000 - 1999999
C7	2000000 - 2999999
C8	3000000 – 4999999

Number of cities by size class of population during the last century is furnished in table 3.4.2.2

Table 3.4.2.2: Cities by Size Class of Population 1901-2011

Census Year	Total	Size Class							
		C1	C2	C3	C4	C5	C6	C7	C8
1901	2	2	-	-	-	-	-	-	-

2011	43	26	07	03	03	02	-	01	01

3.4.3 Density : Density is defined as number of persons living in per square kilometer. The area used for calculating the density is the total area including river, land and forest area with the total population as enumerated in 2011 and 2001 censuses.

Table- 3.4.3.1 shows that most of the zilas fall within 1501 and above density ranges of which 14 zilas fall in the range of 1501-2000, 22 zilas fall in the range of 2001-3000, 13 zilas fall in the range of 3001-4000 and 9 zilas fall in the range of 4001 and above.

Table 3.4.3.1: Number of Zilas by Urban Density Range, 2011

Density Range	Number of Zilas
Below 1000 Persons	3
1000-1500 Persons	3
1501-2000 Persons	14
2001-3000 Persons	22
3001-4000 Persons	13
4001 persons and above	9
Total	64

Table 3.4.3.2 shows Division and Zila-wise urban density where Dhaka zila maintains the highest density of 43578 persons per sq.km. and Narayanganj zila has the second highest density with 9087 persons per sq.km. Urban density of all the three hilly zilas is very low. Rangamati zila shows the lowest density with

415 persons per sq.km. Ranking of zilas by urban density from highest to the lowest has also been shown in the table-3.4.3.2.

Increase of urban density is found in most of the zilas in 2011. Out of 64 zilas, 58 zilas show increase of urban density during 2001-2011. It is found in table 3.4.3.2 that Dhaka Division has the highest density with 7444 persons per sq.km. Barisal, Chittagong, Khulna, Rajshahi, Rangpur and Sylhet Division show the urban density 2046, 2804, 2555, 2780, 2416 and 3075 persons per sq.km. respectively which are below the density of national urban average of 3785 persons per sq.km. A total of 51 zilas show the urban density below the national average. These are 6 zilas of Barisal Division, 9 zilas of Chittagong Division, 12 zilas of Dhaka Division, 9 zilas of Khulna division, 8 zilas of Rajshahi Division 7 zilas of Rangpur Division and 3 zilas of Sylhet Division. The higher urban density in the zilas of Dhaka Division is due to high urbanization and the lower density in the zilas of Barisal may be due to migration of a section of people for getting higher education, employment and other facilities of life.

3.4.4 Household Size and Growth: Household is the basic unit of census enumeration. Demographic events like birth, death and many other socio-economic characteristics can be explained with reference to household as a unit.

In 2011 census household has been defined as a person or group or persons related or unrelated, living together and taking food from the same kitchen. Households are divided into three categories such as:

General, institutional, and others.

- 1) **General Household:** It includes all households having usual dwelling places.
- 2) **Institutional Household:** It includes those households found in census night living in hospitals, clinics, jails, barracks, orphanages and hostels or dormitories.

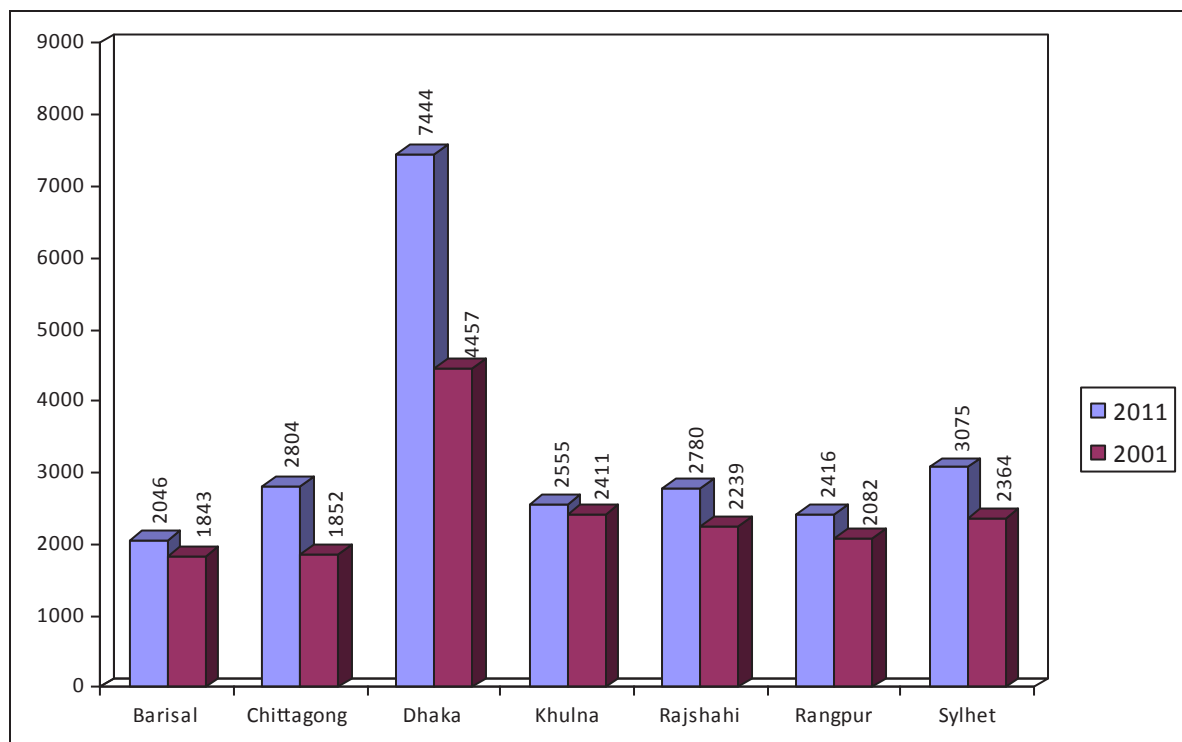

- 3) **Other Household:** It includes those households found in census night other than dwelling or institutional households; i.e. living in messes, hotels, motels, rest or guest houses, dak-banglows or circuit houses and business, industry or office premises etc.

A bar diagram showing density of urban population for 2001 and 2011 is presented in figure-3.3.

Table 3.4.4.1 : Density of Urban Population (sq. km.) by Division, 2001-2011

Name of Division	Density (sq.km.)	
	2011	2001
Barisal	2046	1843
Chittagong	2804	1852
Dhaka	7444	4457
Khulna	2555	2411
Rajshahi	2780	2239
Rangpur	2416	2082
Sylhet	3075	2364

Figure 3.3: Density of Urban Population (per sq.km.) by Division, 2011 and 2001

An increasing trend in the urban household is found over times. Table 3.4.4.2 shows number of urban households, percentages and intercensal increases from 1974 census to 2011.

Table 3.4.4.2 : Number and Percentage of Urban Household, 1974-2011

Year	Number	Percentage (%)	Intercensal Increase (%)
1974	1065353	8.40	126.29
1981	2254213	15.30	111.59
1991	3789338	19.53	68.10
2001	6035144	23.68	59.27
2011	7502040	23.32	24.31

It appears from the above table that the percentage of urban household in the country has been steadily increasing from 1974 to 2001 after which the increasing rate has slightly gone down in 2011 only by 0.36 percent point. Inclusion of upazila headquarters as urban area contributed significantly to increase the percentage of urban households especially in 2001 when most of the thana headquarters were brought under urban frame.

Table 3.4.4.3: Urban Household by Residence, 2011

Residence	Urban Household	Percentage
Bangladesh	7502040	100.00
Paurashava	3543504	47.23
City Corporation	2559937	34.13
Other Urban Area	1369028	18.25
Cantonment	29571	0.39

The table 3.4.4.3 indicates that paurashava and city corporation account for 81.36% of the total urban households. The other urban areas which include Upazila Headquarters contribute 18.25% of the urban households. The rest (0.39%) is contributed by Cantonment.

3.5 Household and Housing Characteristics:

Distribution of the main house of the general household by structure is presented in table 3.5.1. According to 2011 census, 11.32% of main structures of dwelling households are pucca, 19.61% semi-pucca, 66.19% kutcha and the remaining 2.88 percent are jhupri in the country. In urban area, 31.86% pucca, 32.02% semi-pucca, 33.54% kutcha and the remaining 2.59% belongs to jhupri. The proportion of kutcha structure is the found slightly higher than the other categories of urban area.

Table 3.5.1: Main House of the General Household by Type of Structure, 2011

Residence	No. of H/H	%	Pucca	%	Semi-Pucca	%	Kutcha	%	Jhupri	%
Bangladesh	31863395	100.00	3606339	11.32	6249784	19.61	21089127	66.19	918145	2.88
Urban	7274553	100.00	2317460	31.86	2329003	32.02	2439676	33.54	188414	2.59

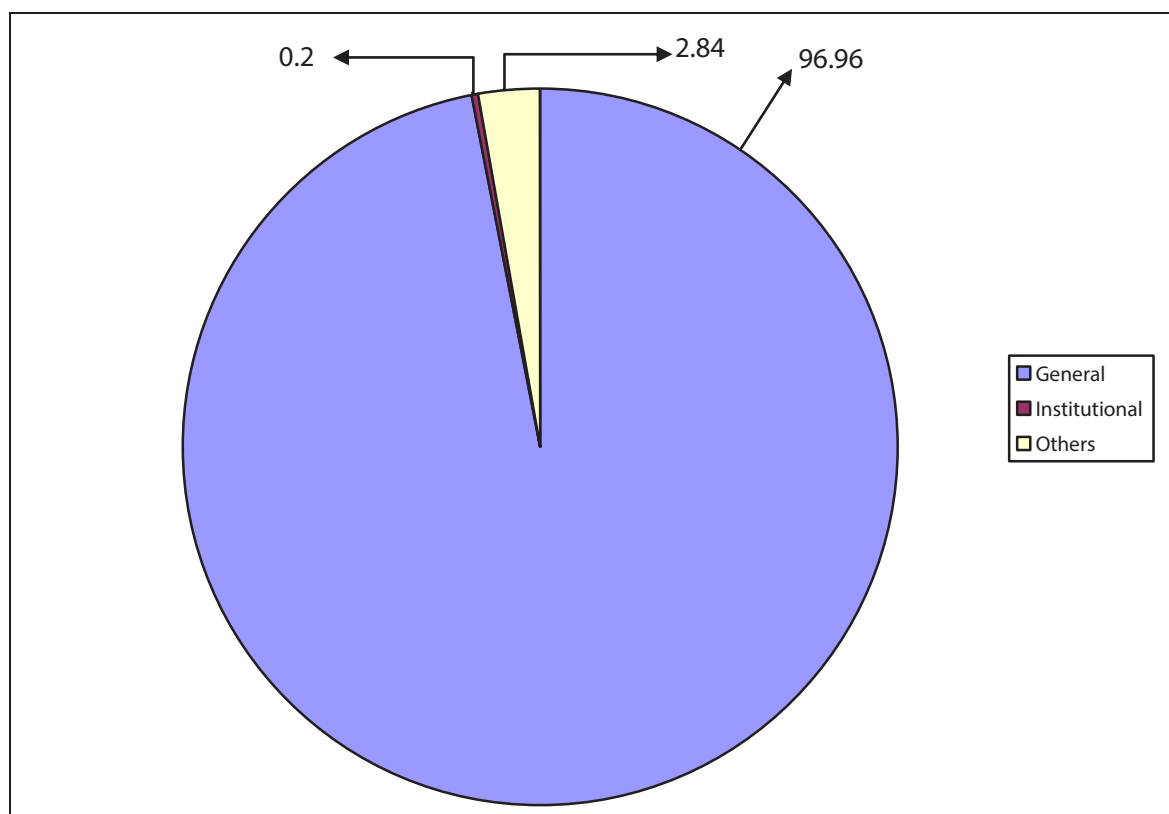

In 2011 census, households have been classified into three categories such as general, institutional and others. The total number of urban households in the country is 7502040 of which 7274553 General, 14715 institutional and 212772 are other households. The general household accounts for 96.96%, institutional 0.20% and others 2.84%. The distribution of households by type is shown in table 3.5.2.

Table 3.5.2 : Urban Household by Type, 2011

Type of Household	Number	Percent
Total	7502040	100.00
General	7274553	96.96
Institutional	14715	0.20
Others	212772	2.84

A pie chart showing urban household by type is presented in figure 3.4.

Figure 3.4: Urban Household by Type, 2011

The annual growth rate of general households during the inter-censal periods of 1974-81, 1981-91, 1991- 2001 and 2001-2011 are shown in table 3.5.3. The table shows that the growth rate of general household for the country has been increasing from 1974-81 to 1991-2001 after which the rate has gone down in 2001-2011. For urban area a significant increase of 8.9% is noticed during 1974-81 after which the rate of increase shows a decreasing trend in the three remaining decades.

Table 3.5.3: Growth Rate of General Household by Residence, 1974-2011

Residence	1974-81	1981-91	1991- 2001	2001-2011
Bangladesh	2.1	2.6	2.8	2.4
Rural	1.3	2.0	2.2	2.4
Urban	8.9	5.7	4.9	2.4

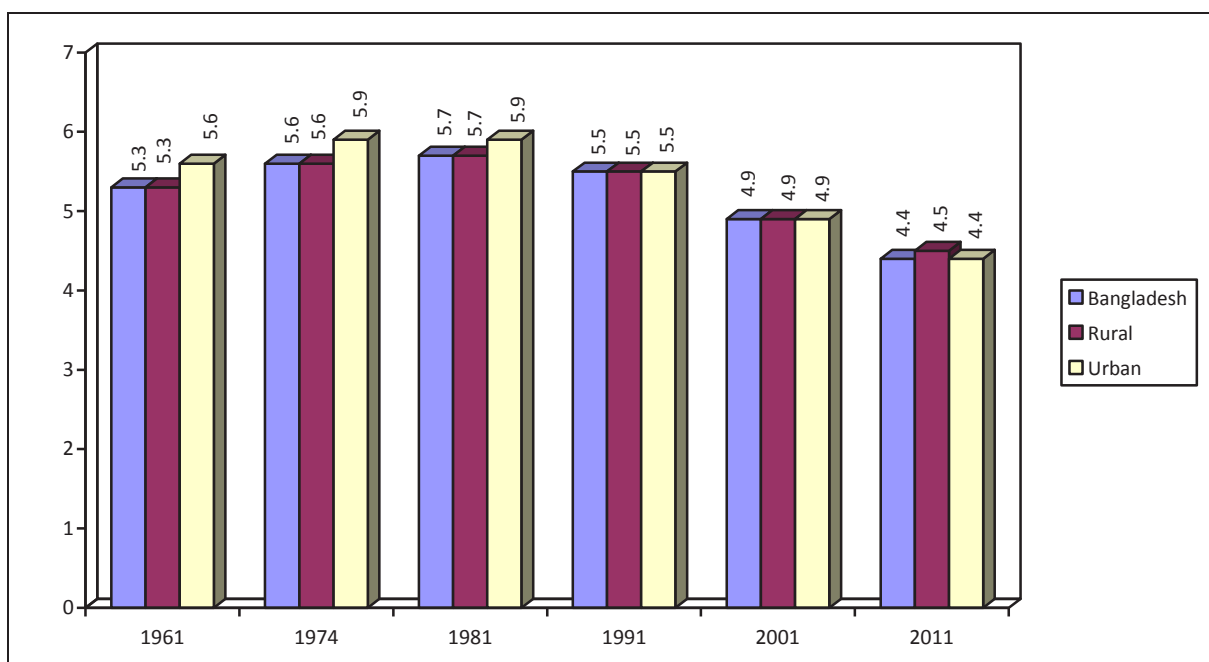

The average size of general household is presented in table 3.5.4. It is seen that in 2011 census average size of urban general households is 4.4 which is smaller than the previous censuses. This decreasing situation in household size may be attributed to the division of joint families to nuclear families in recent years.

Table 3.5.4: Average Size of General Household by Residence, 1961-2001

Residence	1961	1974	1981	1991	2001	2011
Bangladesh	5.3	5.6	5.7	5.5	4.9	4.4
Rural	5.3	5.6	5.7	5.5	4.9	4.5
Urban	5.6	5.9	5.9	5.5	4.9	4.4

A bar diagram showing general household size by residence, 1961-2011 is presented in figure 3.5.

Figure 3.5: General Household Size by Residence, 1961-2011

Urban household size by religious community can be seen from table 3.5.5. The table shows that the size of urban general household is the highest for both Muslim and Hindu communities which are same as national average of 4.4. Urban general household size is found the lowest for Christian Community (4.0).

Table 3.5.5: General Household Size by Religious Communities, 2011

Religion	Bangladesh	Urban
Total	4.4	4.4
Muslim	4.4	4.4
Hindu	4.4	4.4
Buddhist	4.5	4.3
Christian	4.1	4.0
Others	4.3	4.2

Division and zila-wise urban households are furnished in table 3.5.6 which shows that all the zilas where the divisional headquarters is located represent large number of household. Among the seven divisions, Dhaka Division maintains the highest number of households (3580687) followed by Chittagong Division (1414985). As regards zila, a large number of households are found in Dhaka Zila (2137247) followed by Chittagong (668542), Gazipur (260555) and Narayanganj (232749). The small number of urban household is found in Meherpur (20568) and Panchagarh (22182).

3.5.1 Household by Source of Drinking Water: The distribution of urban general households by source of drinking water is furnished in table 3.5.1.1. It is noticed that only 10.3% households of the country have the access to tap water facilities and 83.9% have tube-well facilities. In urban area, these rates are 37.4% and 59.5% respectively. A significant number of urban households use tap water as a source of drinking water which is much higher than the rate for the country as a whole. A negligible percentage of urban households (3.1%) depend on other sources for drinking water.

Table 3.5.1.1: Urban General Household by Source of Drinking Water, 2011

Residence	Total	%	Tap	%	Tube Well	%	Others	%
Bangladesh	31863395	100.00	3272085	10.3	26739024	83.9	1852286	5.8

A bar diagram showing general households by sources of drinking water, 2011 is presented in figure 3.6.

Figure-3.6 : General Household by Source of Drinking Water, 2011.

Division and zila wise distribution of general household by source of drinking water is shown in table 3.5.1.2. It appears from the table that highest proportion of urban households using tap as the main source of drinking water relates to Dhaka Division (57.7%) followed by Chittagong Division (31.9%) while Rangpur Division ranks the lowest with only 6.7%. The proportion of urban household using tube-well water as the main source of drinking water is highest in Rangpur Division with 91.8% and the lowest in Dhaka Division with 40.3%. The proportion of urban households using other sources as the main source of drinking water is highest in Sylhet Division with 5.6% while lowest in Rangpur Division (1.5%).

3.5.2 Dwelling Unit by Tenure: Urban dwelling units by tenure has been shown in table 3.5.2.1. Out of total urban dwelling households 50.84% are owned while 45.52% are rented and 3.63% are rent free. It is seen that, percentage of owned urban household is lower than that of rural household. On the other hand, the proportion of rented and rent free households in the urban area are higher than that of rural area.

Table 3.5.2.1: Dwelling Unit by Tenure and Residence, 2011

Residence	Housing Tenancy (%)			
	Total	Owned	Rented	Rent Free
Urban	7274553	3698526	3311661	264366
Rural	24588843	22768299	1066593	753951
Percentage				
Urban	100.00	50.84	45.52	3.63
Rural	100.00	92.60	4.33	3.07

3.6 Age and Sex composition: This section has been divided into two sub-sections, such as.

- (i) Sex composition and
- (ii) Age distribution.

3.6.1 Sex composition: The urban population of Bangladesh is 33563183 of which 17529792 (52.23%) are male and 16033391 (47.77%) are female. The urban sex ratio for all religion is 109 which is higher than the national average of 100. Sex ratios for different religious communities have been presented in table 3.6.1.1. The table shows that sex ratios in 2011 of all communities for national, urban and rural areas are remarkably lower than 2001. It appears from the table that the sex ratio of urban population for all religions has come down to 109 in 2011 from 116 in 2001. The sex ratio of urban area are found much higher than that of rural area. This particular situation is mainly attributed to the migration of a large number of males to urban area with a view to seeking job and for obtaining higher education without their counterparts.

Table 3.6.1.1: Sex Ratio for Religious Communities by Residence, 2001 and 2011

Religious Communities	2011			2001		
	Total	Urban	Rural	Total	Urban	Rural
All Religion	100	109	98	106	116	104
Muslim	100	110	97	106	116	103
Hindu	102	108	100	107	115	105
Christian	98	99	98	103	106	102
Buddhist	102	103	102	107	109	106
Other	100	104	100	103	108	102

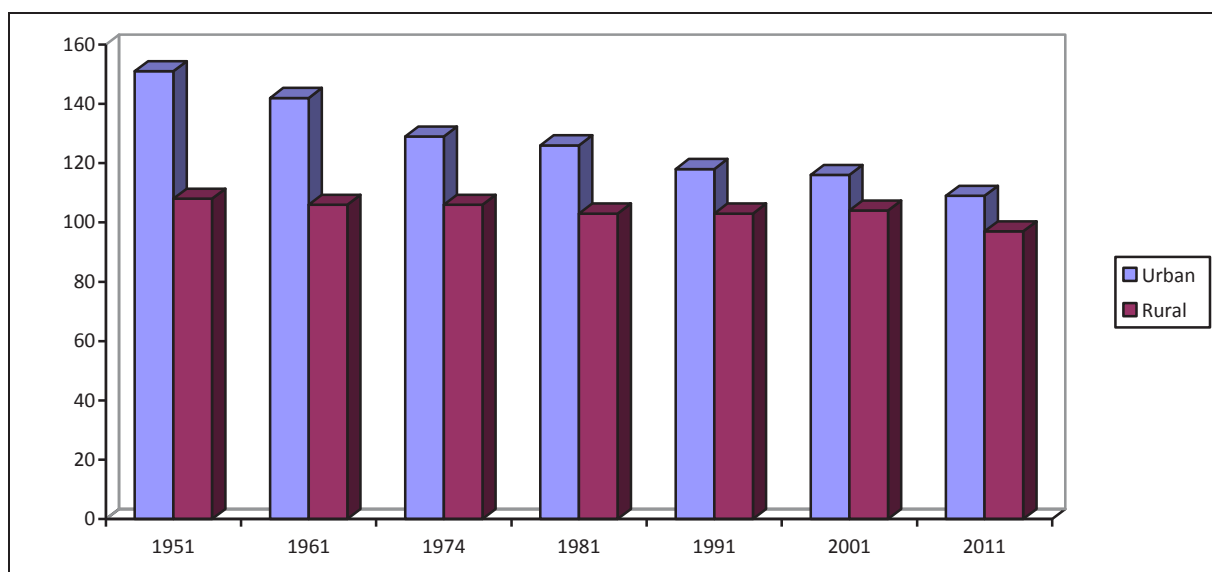

It is seen in the table 3.6.1.2 that the sex ratio of urban area has been steadily decreasing since 1951 whereas sex ratio in rural area shows a fluctuating trend. It is observed that, sex ratios in urban area of 2011 are remarkably higher than those rural area. This may be the result of migration of a section of males to urban area without their female counterparts in order to participate in the income generating activities and for taking part in higher education.

Table 3.6.1.2: Sex Ratio by Residence, 1951-2011

Year	Urban	Rural
1951	151	108
1961	142	106
1974	129	106
1981	126	103
1991	118	103
2001	116	104
2011	109	97

A bar diagram showing sex ratio by residence is presented in figure 3.7.

Figure 3.7: Sex Ratio by Residence, 1951-2011

City wise Sex ratio for the city having population 100000 and above has been presented in table 3.6.1.3. It is found that the sex ratio in 2011 is highest in Tongi (169) and lowest in Chapai Nawabganj (91).

3.6.2 Age Composition: Zila-wise percentages of urban population by specific age groups have been shown in table 3.6.2.1.

The table shows that 19.47% urban population of the country fall in the age group 0-9 years, 10.76% in the age group 10-14 years, 64.03% in the age group 15-59 years and 5.74% in the age group 60 years and above. The percentage distribution of urban population shows that the overwhelming majority of population are concentrated in the age group 15-59. It is found that there are slight differences in the percentages among the zilas. The highest percentage population (69.37%) belongs to Dhaka Zila followed by Chittagong with 65.47%. It is found that the percentage of urban population below 10 years is highest in Brahmanbaria (26.40%) and lowest in Dhaka (16.88%). On the other hand, the proportion of older age population (60 years+) is the highest in Pirojpur zila (8.31%) and the lowest in Gazipur zila (3.83%).

3.7 Literacy :

In 2011 population and housing census a person is considered as literate who is able to write a letter. The literacy rates of population 7 years and above have been furnished in table 3.7.1.

Table 3.7.1: Literacy Rates of Population (7 years and above) by City Corporation and Sex, 2011

City Corporation	Literacy Rate (7 Years and above)		
	Both	Male	Female
Bangladesh	72.90	75.83	69.34
Barisal	75.27	77.03	73.38
Chittagong	68.67	71.56	65.42
Dhaka	74.55	77.45	70.84
Khulna	73.64	76.58	70.44
Rajshahi	73.96	76.75	70.96
Sylhet	67.46	70.62	63.80

The above table shows that Barisal City Corporation maintains the highest rate of literacy with 75.27% which is above the national average 72.90%. Dhaka City Corporation and Rajshahi City Corporation rank the second and the third with 74.55% and 73.96% respectively which are also above the national average. Sylhet City Corporation ranks the lowest with 67.46% which is below the national average .

A bar diagram showing literacy rate of population 7 years and above by city corporation and sex is presented in figure 3.8.

Figure 3.8: Literacy Rate of Population (7 years +) by City Corporation and Sex, 2011

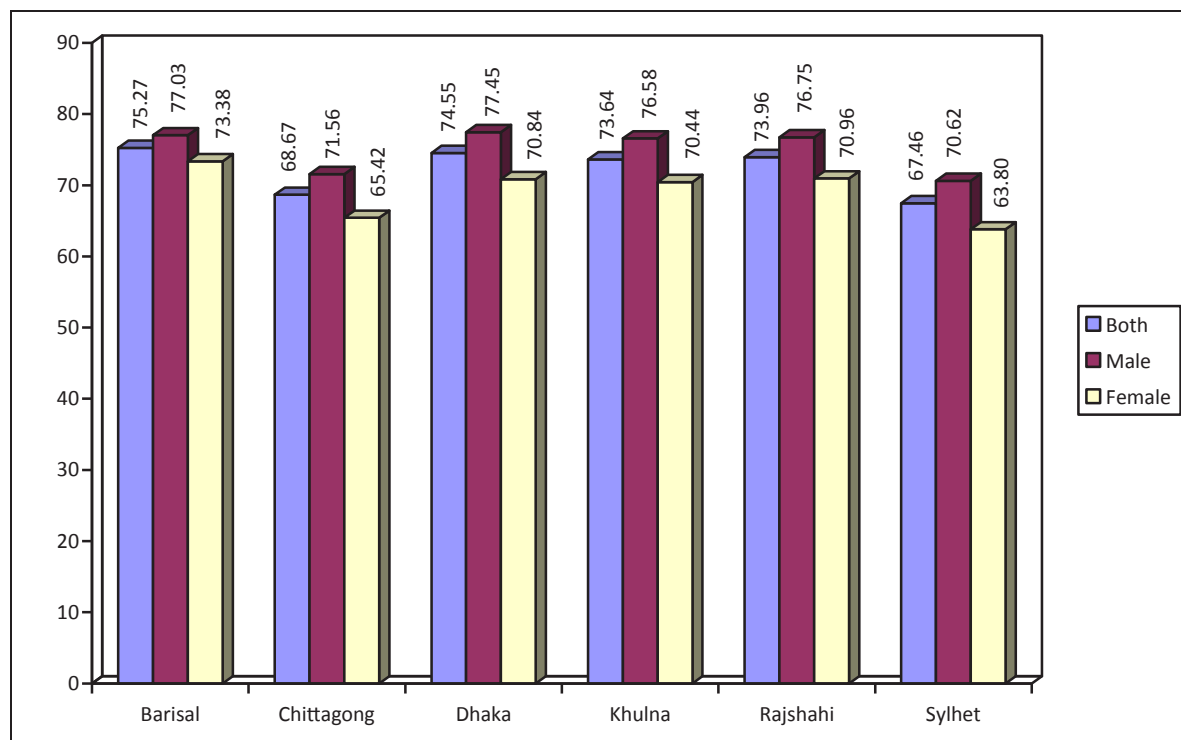

Table 3.7.2 provides literacy rates of urban population by zila and division. It is observed from the table that Pirojpur zila has the highest urban literacy rate of 75.37%, with 76.25% for male and 74.48% for female. Dhaka zila ranks second with 73.54% with 76.40% for male and 69.94% for female. Among the other zilas, Jhalokati, Barisal, Khulna and Barguna maintain the higher urban literacy rate of 73.35%, 72.99%, 71.79% and 69.91% respectively. The lowest urban literacy rate 50.07% is found in Cox's Bazar zila with 52.08% for male and 47.79% for female. The other zilas with low urban literacy rates are Sunamganj, Jamalpur, Kurigram and Sherpur with 51.31%, 52.20%, 52.66% and 53.45% respectively. The male literacy rate except Bhola and Chapai Nawabganj zila is found higher than female literacy rate in every zila.

Table 3.7.2: Literacy Rate of Urban Population 7 Years and above by Zila and Sex, 2011

Sylhet	60.19	63.20	56.95

A bar diagram showing urban literacy rate by division and sex is presented in figure 3.9.

Figure 3.9: Urban Literacy Rate by Division and Sex, 2011

3.8 Religious Composition :

Percentage distribution of population by religion has been presented in table 3.8.1. Muslims and Hindus are the two main religious communities in Bangladesh. The other communities including Buddhism and Christianity have most insignificant contribution of the total population of the country. It is found in the table that 90.8% urban population are Muslim, 8.2% are Hindu, 0.6% are Buddhist, 0.3% are Christian

and the rest 0.1% belong to other unspecified religion. The distribution shows that the Muslim being the major religious community of the country constitutes overwhelming proportion in both rural and urban areas. The rural share is slightly less than the urban proportion. The proportion of Hindus in urban areas is marginally lower than their rural proportion.

Table 3.8.1: Population by Religion and Residence, 2001 and 2011

Religious Community	2011			2001		
	Bangladesh	Rural	Urban	Bangladesh	Rural	Urban
Total	100.00	100.00	100.00	100.00	100.00	100.00
Muslim	90.4	90.3	90.8	89.6	89.4	90.2
Hindu	8.5	8.7	8.2	9.3	9.5	8.7
Christian	0.3	0.3	0.3	0.3	0.3	0.4
Buddhist	0.6	0.7	0.6	0.6	0.6	0.6
Others	0.2	0.2	0.1	0.2	0.2	0.1

Similarly, percentage distribution of population in city corporation by religion is furnished in table 3.8.2.

It appears from the table 3.8.2 that Dhaka City Corporation has the highest percentage of Muslim population 95.31% followed by Rajshahi City Corporation 93.85%. The lowest percentage for the same community is 87.15% in Sylhet City Corporation followed by Chittagong City Corporation 87.77%. On the other hand, Sylhet City Corporation has the highest percentage of Hindu population 12.63% followed by Chittagong City Corporation 10.68%. The lowest percentage for the same is 3.89% in Dhaka City Corporation followed by Rajshahi City Corporation 5.39%. Percentage of Christian and Buddhist Population are 1.33% and 1.30% respectively in Khulna City Corporation. Percentages of Christian and Buddhist population are found lowest in Sylhet City Corporation and Khulna City Corporation with 0.09% and 0.01% respectively.

Table 3.8.2: Population by Religion and City Corporation, 2011

City Corporations	Total	Percentage Distribution of Population by Religion				
		Muslim	Hindu	Christian	Buddhist	Others
Barisal	100.00	89.30	9.70	0.98	0.02	0.00
Chittagong	100.00	87.77	10.68	0.19	1.30	0.06
Dhaka	100.00	95.31	3.89	0.64	0.14	0.02
Khulna	100.00	89.62	9.02	1.33	0.01	0.02
Rajshahi	100.00	93.85	5.39	0.44	0.02	0.30
Sylhet	100.00	87.15	12.63	0.09	0.06	0.07

Zila-wise distribution of religious composition have been shown in Table 3.8.3. Out of 64 zilas, 22 zilas have the percentages of urban population which are above national average (90.82%). Distribution of urban population by religion shows that Chapai Nawabganj Zila belongs the highest percentage of Muslim population with 96.27%. The other zilas having higher percentage of Muslim population are Gazipur (95.67%), Chuadanga (95.60%), Dhaka (95.52%), Jamalpur (95.18%) and Noakhali (94.02%). The lowest percentage of urban Muslim population belongs to Rangamati with 52.76%. Khagrachhari and Bandarban with 57.36% and 68.59% respectively.

The highest percentage of urban Hindu population is found in Narail zila with 27.19% and the lowest in Meherpur Zila with 3.33%. Out of 64 zilas, 43 zilas have urban Hindu population percentage above national level of 8.15%. The Buddhist population is significantly high in the 3 hilly zilas and Cox's Bazar Zilas. The highest percentage is seen in Rangamati with 36.33% followed by Khagrachhari with 25.33% and Bandarban with 20.11%. Cox's Bazar having Buddhist population percentage of 2.31%. The Christian population are quite insignificant in all over Bangladesh where urban percentage is less than 1% except Meherpur, Bandarban, Dinajpur, Khulna and Gopalganj zilas. In these zilas, percentages of Christian population are 4.26%, 2.51%, 1.25%, 1.23% and 1.09% respectively. Out of 64 zilas, 16 zilas maintain percentage above national average (0.35%).

3.9 Economic Activities : Economically active population or the labour force of a country comprises persons who are actually engaged or desirous of engaging themselves in the production of economic goods and services. Economically active population, therefore, comprises employed as well as unemployed population who are seeking job. On the other hand, housewives, students and other inactive persons are treated as not being economically active.

There has been a significant variation in the definition of economically active population in the recent censuses. The 1951 census considered a person of age 10 years and above to be economically active if he or she was reported as self-supporting or partially self-supporting. In 1961 census, the definition was more elaborate and clear. It defined economically active persons as those of age 10 years and above who were working for profit or earning wage or salary or working as unpaid family helpers, and those who were looking for job. One striking feature is that the 1961 definition included housewives in the labour force. The 1974 census followed almost similar definition but excluded housewives from labour force. Both males and females engaged in household work (not out side home) were excluded from labour force in 1981. Persons looking for job i.e. unemployed persons were not identified in 1981 census. In 1981 census persons of aged 10 years and over were classified by their usual activities like (1) not working, (2) household work, (3) cultivation, (4) forestry, fishery and livestock work, (5) manufacturing workers (6) business and (7) others and as such there is no scope for the identification of unemployed persons. The 1991 census defines economically active population as persons of aged 10 years and above, who were either employed or unemployed and unpaid family helpers who spent at least 20 hours during the last week for gainful economic activity. In 2001 census persons of aged 10 years and above have been classified as (1) Does not work, (2) looking for work, (3) Household work, (4) Agriculture, (5) Industry ,(6) Water, Gas and Electricity, (7) Construction, (8) Transport and communication, (9) Hotel restaurant, (10) Business, (11)Service and (12) others. In 2011 Census persons of aged 10 years and above have been classified as (1) Employed (2) Looking for work (3) Household work and (4) Does not work.

3.9.1 Crude Activity Rate: The crude activity rate is defined as the ratio of economically active population in age group 10 years and over to total population expressed in percentage. The economically active are those who are either working or not working but looking for work.

Crude activity rate of urban population 10 years and above by sex, zila and division has been presented in table 3.9.1.1. It is found in the table that the highest crude activity rate 48.04% is maintained by Gazipur zila with 65.25% for male and 28.50% for female. The lowest rate 25.29% is found in Noakhali zila with 45.67% for male and 5.16% for female.

Table 3.9.1.1: Crude Activity Rate of Urban Population (10 years+) by Sex and Zila, 2011

(Excluding household based economic activity)

3.9.2 Refined Activity Rate: The refined activity rate is defined as the ratio of economically active population in age group 10 years and above to total population of the same age group expressed in percentage. The economically active are those who are either working or not working but looking for work.

Refined activity rate of urban population 10 years and above by sex, zila and division has been presented in table 3.9.2.1. It is observed that the highest refined activity rate 58.76% belongs to Gazipur zila with 79.18%, for male and 35.18% for female. The lowest rate in 33.42% is found in Noakhali zila with 60.97% for male and 6.75% for female.

CHAPTER - 4

URBAN AGGLOMERATIONS

In 2011 Population and Housing Census, a total of 506 urban centers are found in the country of which only 43 urban centers exceed population of 100000 and above. These include six city corporations and 37 class 1 cities in the country. Among the cities, Bogra has maintained the same position 7th for both 2001 as well as 2011 censuses. The other cities like Barisal, Brahmanbaria, Comilla Adarsha Sadar, Dinajpur, Jamalpur, Jessore, Mymensingh, Naogaon, Narshingdi, Pabna, Sirajganj and Tangail which have decreased their position from 2001 to 2011. Excluding 6 city corporations and the 37 class 1 urban centers with population of 100000 and above account for 38.70% of total urban population of the country. This indicates that the urban population is highly concentrated in few big cities. The population of these class 1 cities together with the population of six city corporations indicate that the highest concentration of population is found in the big cities (61.30%). On the other hand, one third of the urban population i.e 34.19% live only in 6 city corporations.

1. Barisal City Corporation: The Barisal Municipality was established in 1876. It was reconstituted under the Basic Democracies Order, 1957 as a municipal committee as per provisions of the Municipal Administration Ordinance, 1960. After the independence of Bangladesh Barisal Municipal Committee was constituted as the Barisal Paurashava. In 2000 it got the status of a city corporation. Barisal City is the sixth largest city of Bangladesh in respect of population. The total population of the city is 339308 of which 174980 are males and 164328 are females. The literacy rate of the city is 74.8%. It consists of Barisal City Corporation with 30 wards and 225 mahallas and its adjoining 3 mauzas as other urban area. The city has an area of 69.19 sq.km. of which 58.05 sq. km. is under the city corporation.

2. Chittagong City Corporation: The Chittagong Municipality was established in 1864. It was reconstituted to Chittagong Municipal Committee under the Municipal Administration Ordinance of 1960. After the independence of Bangladesh Chittagong Municipal Committee was renamed as Chittagong Paurashava according to Bangladesh Local Councils and Municipal Committees (Amendment) Order 1972. In July 1990 the Chittagong Paurashava got the status of a city corporation. The Chittagong City Corporation is the second largest city corporation in respect of population with an area of 155.40 sq.km. The total population of the city corporation is 2581643 of which 1360125 are males and 1221518 are females. The literacy rate of the city is 68.8%. It consists of 41 wards and 238 mahallas. The entire city area is under the city corporation.

3. Dhaka City Corporation: The Dhaka Municipality was established in 1864. It was reconstituted as municipal committee in 1960 in pursuance of the Basic Democracies Order introduced in 1957. The municipal committee was reconstituted as paurashava in 1972 according to the Bangladesh Local Councils and Municipal Committees (Amendment) Order, 1972. In 1983 it was replaced as Dhaka Municipal Corporation and finally in 1991 it got the status of a city corporation. Dhaka City Corporation is the largest local Government unit of Bangladesh. The total population of the city is 8906039 of which 4931802 are male and 3974237 are female. The literacy rate of the city is 73.6%. It consists of 42 thanas including Dhaka City Corporation with 92 wards, 2 restricted areas, and 837 mahallas and its adjoining 17 unions as other urban area. The thanas are Adabar, Badda, Bangshal, Bimanbandar, Cantonment, Chakbazar, Darusalam, Demra, Dakshin Khan, Dhanmondi, Gendaria, Ghulshan, Hazaribagh, Jatrabari, Kadamtali, Kafrul, Kalabagan, Kamrangir Char, Khilgaon, Khilkhet, Kotwali, Lalbagh, Mirpur, Mohammadpur, Motijheel, Newmarket, Palton, Pallabi, Ramna, Rampura, Sabujbagh, Shah Ali, Shahbagh, Sher-e-Bangla Nagar, Shyampur, Sutrapur, Tejgaon, Tejgaon Industrial area, Tongi, Uttara, Uttar Khan and Wari.

4. Khulna City Corporation: Khulna Municipality was established in 1884. It was reconstituted as municipal committee in accordance with the Municipal Administration Ordinance of 1960. The municipal committee of Khulna was replaced by a paurashava in 1972 according to the Bangladesh Local Councils and Municipal Committees (Amendment) Order, 1972. It was replaced by Khulna City Corporation in 1992. Khulna City Corporation is the third largest city corporation of south west Bangladesh. It has an area of 50.61 sq.km. The city corporation consists of 31 wards and 200 mahallas including Gilatola Cantt. The total population of the city corporation is 664728 of which 346069 are male and 318659 are female. The literacy rate of the city corporation is 73.6%. The entire city area is under the city corporation.

5. Rajshahi City Corporation: Rajshahi Municipality in the name of Rampur Boalia Municipality was established in 1876. It was functioning as the municipal committee in terms of the Basic Democracies Order of 1959. Rajshahi Paurashava replaced the Rajshahi Municipal Committee by the Bangladesh Local Councils and Municipal Committees (Amendment) Order, 1972. In 1991 it got the status of a city corporation. It is the fifth largest city corporation of Bangladesh in respect of population. It has an area of 97.18 sq.km. It consists of 30 wards and 283 mahallas including Boalia Cantt. The total population of the city corporation is 448087 of which 231700 are males and 216387 are females. The literacy rate of the city is 74.0%. The entire city area is under the city corporation.

6. Sylhet City Corporation: The Sylhet Municipality was established in 1885. It was reconstituted as municipal committee in accordance with the Municipal Administration Ordinance of 1960. The municipal committee was replaced by Sylhet Paurashava in 1972, according to the Bangladesh Local Councils and Municipal Committees (Amendment) Order 1972. It was emerged as Sylhet City Corporation in 2001. It is the fourth largest city corporation of Bangladesh in respect of population. The total population of the city is 531663 of which 285892 are male and 245821 are female. The literacy rate of the city is 67.4%. Sylhet City consists of Sylhet City Corporation with 27 wards and 236 mahallas and its adjoining three mauzas as other urban area and Sylhet Cantonment. It has an area of 41.85 sq.km. of which 26.50 sq.km. is under city corporation.

Other Cities: Apart from 6 city corporations there are 37 cities in Bangladesh having population of 100000 and above. These are Begumganj(Chowmohoni), Bhairab, Bogra, Brahmonbaria, Chandpur, Chuadanga, Comilla Addarsha Sadar, Comilla Dakshin, Coxs Bazar, Dinajpur, Faridpur, Feni, Gazipur, Jamalpur, Jessore, Jhenaidah, Kadam Rasul (Bandar), Kaliakair, Kishoreganj, Kustia, Mymensingh, Naogaon, Narayanganj, Nawabganj, Noakhali, Narsinghdi, Pabna, Rangpur, Saidpur, Satkhira, Savar, Shidhhirganj, Sirajganj, Sreepur, Tangail, Tarabo and Tongi.

This chapter has been developed to complement the census data users in doing their research and development works. It is obviously believed that this exercise will definitely fulfill their desires and requirements.

Acronyms

BBS – Bangladesh Bureau of Statistics

BIDS – Bangladesh Institute of Development Studies

EA – Enumeration Area

EU – European Union

GIS – Geographical Information System

HH – Household

HYV – High Yielding Variety

iCADE- Integrated Computer Assisted Data Entry

ICR – Intelligent Character Recognition

KFI – Key From Image

OCR – Optical Character Reader

OMR – Optical Mark Reader

OUA – Other Urban Area

PSA – Paurashava

PEC – Post Enumeration Check

QA – Quality Assurance

SA – Supervisors Area

SID – Statistics and Informatics Division

TIFF – Tagged Image File Format

UHQ – Upazila Headquarter

UNFPA- United Nations Population Fund

USAID- U.S. Agency for International Development

* Hot- deck – Hot deck imputations is a method for handling missing data in which each missing value is replaced with an observed response from a “similar” unit.

* Cold- deck – This imputation, by contrast, selects missing data from another dataset.

Technical Committee

Chairperson

Mr. Waliul Islam

Former Secretary, Statistics Division

Co-Chairperson

Director General

Bangladesh Bureau of Statistics (BBS)

Members

Prof. Kazi Saleh Ahmed	Former Vice-Chancellor Jahangirnagar University
Joint Secretary	Statistics and Informatics Division
Dr. Rafiqul Huda Chowdhury	Former UN Expert
Prof. Barkaat-e-Khuda	Department of Economics University of Dhaka
Representative	Department of Women and Gender Studies, University of Dhaka
Chairman	Department of Population Science University of Dhaka
Director General	National Institute of Population Research and Training, Dhaka
Prof. M. Kabir	Department of Statistics Jahangirnagar University
Project Director	Population & Housing Census 2011 Project Bangladesh Bureau of Statistics (BBS)
Mr. Abdul Baten	Former Director Bangladesh Bureau of Statistics (BBS)

Member-Secretary

Director	Census Wing Bangladesh Bureau of Statistics (BBS)

Project Directors' Forum

Convener

Mr. Md. Mashud Alam
Joint Director
Bangladesh Bureau of Statistics (BBS)

Members

Mr. Md. Zahidul Hoque Sarder	Director
Dr. Dipankar Roy	Deputy Director
Mr. Md. Kabiruddin Ahmed	Deputy Director
Mr. Bidhan Baral	Deputy Director
Mr. Jatan Kumar Saha	System Analyst
Mr. Md. A.K.M. Ashraful Haque	Deputy Director
Mr. Md. Dildar Hossain	Deputy Director

List of officials Engaged in Preparing this Report

1.	Mr. Md. Mashud Alam	Project Director Population and Housing Census 2011
2.	Md. Shamsul Alam	Consultant Population and Housing Census 2011
3.	Dr. Dipankar Roy	Deputy Director
4.	Mr. Md. Kabiruddin Ahmed	Deputy Director
5.	Mr. Mostafa Ashrafuzzaman	Deputy Director
6.	Mr. Bidhan Baral	Deputy Director
7.	Mr. Md. Mahmuduzzaman	Deputy Director
8.	Mr. Md. Golam Mostofa	Deputy Director
9.	Mr. Jatan Kumar Saha	System Analyst
10.	Mr. Md. Salimur Rahman	Statistical Officer
11.	Mr. Md. Mostak Ahmed Miah	Programmer
12.	Mr. Mohammad Anamul Haque	Maintenance Engineer
13.	Mr. Md. Khorshed Alam	Assistant Statistical Officer
14.	Mr. Enayet Hossain	Assistant Statistical Officer
15.	Mr. Md. Rezaul Karim	Assistant Statistical Officer

Report Writing Consultants

01. Mr. Mahmudul Hoque
02. Mr. Md. Mukhlesur Rahman
03. Mr. Md. Shahjahan Ali Khan
